E.U. REACH statement

This statement concerns European Union regulation 1907/2006 of 18 December 2006 -- Registration, Evaluation, Authorisation and Restriction of Chemicals, also known as REACH.

Under REACH regulations we are considered a provider of "articles." All of our products are assemblies, not raw materials. None of our products intentionally releases substances to the environment. None of our materials of construction are substances of very high concern (SVHC). The sum of each unique construction material in our articles imported into the E.U. is less than one tonne per year.

Given those conditions our current products are exempt from REACH pre-registration and later registration activities. We will assist customers who use our products in larger assemblies to analyse their own articles' compliance to REACH. We provide separate E.U. Reduction of Hazardous Substances documentation for our RoHS compliant products.

Our exempt status is based on our understanding of REACH as given in guidance document http://reach.jrc.it/docs/guidance_document/articles_en.pdf (dated May 2008) and our knowledge of materials used to manufacture our products.

A handwritten signature in black ink that reads "Eric D. Arnold".
